OPEN OR 100% TAILOR-MADE TRAINING

Open training sessions on wastewater treatment and reuse

Our open training courses are designed to provide participants with a solid knowledge of water treatment, management and reuse: possibilities, bottlenecks, best available techniques, parameters for follow-up, ...

Organised several times a year, these sessions provide practical knowledge that can immediately be applied to participants' jobs. Come learn, network and brainstorm with us during any of our open training sessions.

Tailor-made training sessions: WWT, lab, operations, follow-up, ...

Would you like to train several people, dive deeper into some of the topics or take a training course that is fully tailored to your business and installations?

You can! Contact us for more information.
